# Booty Builder V8

The Booty Builder® V8 is our latest innovation. It is built on experience from our seven previous models.

BB V8 is totally redesigned. It takes less space and footprint than our previous models. Easier to adjust and faster setup!

Booty Builder makes hip-thrusting safer, faster and more effective. The patented raised feet design puts you in the ultimate position to isolate the glutes.

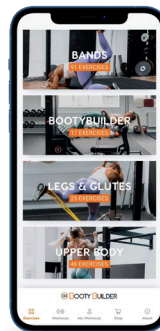

Booty Builder has a wide range of users. From gym members wanting strong glutes, medical facilities and professional sporting teams.

People are realizing the importance of glute activation for physical function, strength and performance.

The Booty Builder V8 comes with 6 free rubber bands that are used for extra resistance.
